## BODY PANEL – FLUSH AND GAP

The human eye is very good at detecting misalignment between automotive bodies and doors, and variations in the gaps between the panels. Fortunately for vehicle manufacturers, SmartRay 3D is even better at inspecting the flush and gap of complex body panels.

### Why SmartRay 3D?

- Accurate flush and gap measurement
- Unaffected by colour and finish of body panels
- No additional lighting or shielding required

### 3D Solution Benefits

- Improved product finish and appearance
- Measures multiple points in short cycle time
- Accurate positioning of vehicle not necessary
