RAZOR – BLADE ALIGNMENT

Multi-blade razor cartridges have become complex assemblies that have to be very accurately assembled to ensure the best possible shaving experience. SmartRay 3D checks the height, spacing and angle of all the blades in each cartridge to ensure total product consistency.

Why SmartRay 3D?

- Checks height, spacing and angle of blades
- High accuracy in all directions
- No calibration required

3D Solution Benefits

- Eliminates assembly defects
- Improved process control
- Consistent shaving performance
