PACKAGING – ADHESIVE DISPENSING

For products to be shipped securely it is vital that they are packaged correctly. Inspecting the coverage and volume of transparent glue on a cardboard surface is hard to monitor manually. But with SmartRay 3D, consistent packaging quality is much easier to achieve.

Why SmartRay 3D?

- Checks coverage and detects missing areas of adhesive
- Measures depth of adhesive over contact area
- Unaffected by variations in surface colour or finish

3D Solution Benefits

- Identifies issues with adhesive dispensing
- Gives immediate feedback to production line
- Ensures integrity of assembled packaging
